

Gilbert Gilkes & Gordon Ltd

Candidate Brief

Background

Gilkes delivers innovative, single source solutions to the Small Hydropower & High Horsepower Engine markets.

Working meticulously with our customers to ensure the very best in product design, total cost of ownership & operational excellence, our range of hydropower turbines and engine cooling pumps deliver solutions to meet the most demanding of technical specifications and environments.

With international credentials earned in over 85 countries, a Royal Warrant and over 165 years of design and manufacturing experience behind us, we are small enough to be agile and responsive, whilst large enough to have the technical and engineering competence needed to be one of the world's leading brands.

Headquartered in Kendal in the English lake district, Gilkes is an independently owned business with circa 160 employees across the world.

We have manufacturing sites in Kendal and Houston, Texas as well as a sales office in Tokyo, Japan.

Our Purpose

Our values-based approach has been shaped from a 165 year heritage as a family-owned business. We believe in developing ethical business relationships with a positive environmental focus that bring about long-term sustainable success. Our people are committed to ensuring that Gilkes' products make a meaningful difference & provide a platform for the transition to a low carbon economy.

People & Culture

We strongly believe that our people are the ultimate differentiator & are at the heart of everything we do. It is their passion, creativity, hard work & dedication that enables Gilkes to grow & prosper.

Gilkes invests in its people & in developing a positive organisational culture.

Our four key values are:

- Teamwork
- Integrity
- Excellence
- Commitment

Current Position & Context

Gilkes is moving fast to adapt to an ever changing economic environment, ensuring we continue to be relevant in our chosen markets.

The organisation recently carried out a strategic review & adjusted its cost base in response to the pandemic.

Pumps is seeing growth & we have had huge interest in our new small marine pump from all of the big players including Caterpillar, Cummins, Volvo, Scania & John Deere.

The small Hydro market is trending towards energy recovery & we are well placed to fully exploit this with our current product portfolio.

The Hydro aftermarket, especially in the UK, offers real growth prospects for Gilkes and we are aligning Service, Modernisation and Electrical to take full advantage of these opportunities.

Our Business Model & Strategy

<p>What we do...</p> <p>We leverage opportunities through our expertise, dedication & agility</p>	<p>Client Acquisition & Development</p> <ul style="list-style-type: none"> • Our customer-facing teams build & maintain a dialogue with clients based on openness & transparency • We build & maintain our customer relationships based on ethical behaviour 	<p>Project Delivery</p> <ul style="list-style-type: none"> • Our aim is to deliver projects 100% on-time-in-full • A formal process exists to ensure the most efficient use of resources & competencies 	<p>Product Life Cycle Management</p> <ul style="list-style-type: none"> • We actively manage & support our products as they transition through their life cycle from New >> Spares >> Service >> Refurbishment

The Appointment

Role Title	Senior Mechanical Engineer
Reporting to	Principal Engineer
Company	Gilbert Gilkes & Gordon Ltd
Website	www.gilkes.com
Based	Kendal, Cumbria
Remuneration	£42,031 to £46,062 per annum depending on experience
Other Benefits	Generous pension scheme 25 days annual leave, plus bank holidays Life Assurance Cycle to Work Scheme Discounted gym memberships

Overview

An exciting opportunity has arisen in our Pump department for a **Senior Mechanical Engineer** to join our well-established engineering organisation, based in our head office in Kendal, Cumbria.

The Role

- Conducting FEA for key pump components (examples of analysis: shaft torsional & fatigue, assembly loads, assembly modal analysis)
- Completing calculations to specify, design, refine and validate key mechanical components (e.g. bearing L10 life, press-fit joint strength)
- Writing testing specifications/procedures to validate analysed components
- Reviewing and approving reports on all the above, created by other engineers in the team
- Contributing to design review meetings with wider engineering teams and with customers
- Collaborating in a team with design engineers and CFD specialists to develop cutting-edge pumps for the next generation of engines
- While the role is based around pumps, the candidate will have opportunities to support engineers working on hydro turbines
- Gilkes support our engineers in CPD and in gaining chartered status or other professional accreditation

Relevant Experience

- A mechanical engineering qualification (degree preferred) together with relevant professional experience
- Finite Element Analysis software experience, preferably ANSYS
- Experience with engineering design processes
- Developing calculations from first principles to solve complex real-world engineering problems

Other experience/personal skills

- Good leadership skills
- Ability to act as a mentor for junior engineers
- Desire to learn and grow in understanding of mechanical principles
- Good customer and supplier stakeholder management skills
- Good interpersonal and communication skills
- Attention to detail with excellent organisational skills and the ability to work to deadlines

Applicants must have the right to work in the UK.

To apply: Please email your CV with a covering letter to the HR Department: recruitment@gilkes.com

Closing date for applications: 28th April 2023
